## PREFACE

The Division of Research and Statistical Services is pleased to present the sixth annual "South Carolina Statistical Abstract". We have continued our effort to furnish extensive statistical information for the State, counties and other geographic areas.

"The South Carolina Statistical Abstract" would not be possible without the assistance and cooperation of the State and Federal agencies who generate the data used. Their efforts are greatly acknowledged.

We welcome all comments and suggestions on what information is needed by those using the Abstract for decision making and planning. Please address all inquiries to The Editor, South Carolina Statistical Abstract, Division of Research and Statistical Services, 1028 Sumter St. - Suite 201, Columbia, South Carolina 29201. Copies may be obtained for \$3.50

1 These data are projected from the 1976 Current Population Survey (CPS) benchmark and have been adjusted for commuting and dual job holding. Consequently, these data represent persons by place of residence and are not strictly comparable to the establishment based nonfarm wage and salary industry employment series. This series replaces all previous labor force series.

2 By Place of Work.

3 A sizeable amount of taxable retail sales cannot be allocated by county. Therefore the sum of the ten districts will not sum to the State total.

4 Includes a total of 3,046 firms engaged in mining, manufacturing and electric, gas and sanitary services.

1) Includes Comprehensive Manpower Program and S.C. Fire Academy.

\* This apparent decrease in enrollments was due to a change in the method used to count enrollments for funding purposes. Since some part-time students enrolled in courses not related to a specific major, each course for which they enrolled, prior to July 1, 1973, counted as one enrollment. With the development of new computer programs and systems techniques, any student now enrolling in several courses or during two or more terms of an academic year is counted as one enrollment for that year.
